MD. ISMAIL BHUIYAN

ID: 5101237831 | **Date of birth:** 15/08/1995 | **Nationality:** Bangladeshi | **Phone number:** (+880) 1706430533 (Mobile) | **Email address:** ismailshuvo13@gmail.com | **LinkedIn:** https://www.linkedin.com/in/ismail-shuvo-b64637131/ |

Address: 57/3 matikata, cantt, dhaka., 1206, Dhaka, Bangladesh (Home)

ABOUT ME

DevOps & Linux System Administrator with 5 years of experience in automation, CI/CD, containerization, and secure infrastructure management. Skilled in designing and maintaining DevOps, DevSecOps, and MLOps pipelines using Jenkins, GitHub Actions, Docker, Kubernetes, Prometheus, Grafana, MLflow, and security scanning tools like Bandit, Docker Scout, and DefectDojo. Strong background in Linux systems, networking, and cybersecurity, with hands-on expertise in firewalls, IDS/IPS, and secure configuration. Adept at solving complex technical challenges, improving system reliability, and driving automation and scalability, with proven leadership experience managing a support team of 9 under high-pressure environments.

WORK EXPERIENCE

DEVOPS ENGINEER – IBCS-PRIMAX SOFTWARE (BANGLADESH) LTD. – 01/08/2025 – Current – DHAKA, BANGLADESH

- Built and maintained CI/CD pipelines using Jenkins, GitLab CI, and GitHub Actions.
- Automated infrastructure provisioning with Terraform and configuration management using Ansible.
- Deployed and managed containerized applications using Docker and Kubernetes.
- Implemented end-to-end MLOps pipelines with Jenkins, Docker, MLflow, Prometheus, and Grafana.
- Set up monitoring, logging, and alerting using Prometheus, Grafana, and the ELK Stack.
- Integrated DevSecOps practices into CI/CD pipelines for security and compliance.
- Performed SAST and DAST using Bandit, Docker Scout, and DefectDojo.
- Automated operational tasks using Bash and PowerShell scripting.
- Managed cloud and on-premises infrastructure for availability and performance.
- Configured networking components, including firewalls, load balancers, DNS, and SSL/TLS.
- Implemented backup and disaster recovery solutions.

SYSTEM ADMINISTRATOR – MYSOFT HEAVEN (BD) LTD. – 11/12/2023 – 31/07/2025 – DHAKA, BANGLADESH

- Web application deployment.
- Server maintenance.
- I am working on DevOps-related work.
- Web services (Nginx, Apache)
- Github, Gitlab, Jenkins
- CI/CD pipeline.
- Docker, Kubernetes.
- Databases (MySQL, MongoDB, Redis).
- prometheus and grafana.
- Ansible.

JR. SYSTEM ADMINISTRATOR – IBSS - INTEGRATED BUSINESS SYSTEMS & SOLUTIONS PVT. LTD. – 01/02/2021 – 31/10/2021 – DHAKA, BANGLADESH

- I was responsible for virtual Linux servers, DB management, network technology, and VPN technology(OpenVPN).
- I worked on virtualization management technology, cloud technology, monitoring technology, etc.
- I know about web servers, GitHub, Docker, and Kubernetes.
- Managed infrastructure upgrades, analysis, and resolution of end-user hardware and software issues.
- Managed IT staff monitoring and diagnosing server and data center problems, and designed and implemented new data center technologies.
- Perform data backups and disaster recovery operations.
- I did manage a support team of 9 people.
- Tested functionality and compatibility of new programs or updated existing applications.

• Performed software installations and upgrades to UNIX or Windows operating systems.

SKILLS

System Administration | Linux OS | Nginx, apache | Docker | Git (Github / Gitlab) | Kubernetes, Docker-Swarm | ELK | prometheus-grafana | Networking | • Database Management | Virtualization | MLOps | Python Project

PROJECTS

01/11/2025 – 10/11/2025

MLOps Project: End-to-End Automated Pipeline (Jenkins, Docker, MLflow, Prometheus, Grafana)

- Designed and implemented a fully automated end-to-end MLOps pipeline using Jenkins, Docker, MLflow, Prometheus, and Grafana.
- Automated model training, experiment tracking, containerized deployment, and CI/CD workflows.
- Implemented monitoring and observability for model performance, API latency, and system health with Prometheus and Grafana.
- Delivered a fully reproducible local MLOps environment with comprehensive documentation.

Link https://lnkd.in/gfp7JYMh

01/07/2025 – 13/07/2025

DevOps Project: Microservices Deployment for a2i

- Deployed a three-microservice application using a full DevOps toolchain in a production-like environment.
- Containerized services with Docker and automated CI/CD using GitHub and Jenkins.
- Orchestrated and scaled microservices with Kubernetes for high availability and resilience.
- Implemented monitoring and alerting using Prometheus and Grafana.

10/08/2025 – 19/08/2025

DevSecOps Project: Automated Security Scanning & Vulnerability Management

Developed and integrated an automated DevSecOps pipeline using GitHub Actions, implementing SAST with Bandit, container scanning with Docker Scout, and centralized vulnerability management with DefectDojo to enforce continuous security and shift security left in the CI workflow.
